**NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS**

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time.

\*\*\*\*\*

**I. GENERAL INFORMATION (Rule R647-3-104)**

1. Name of Mine: Tom Taylor No.3 Shaft
2. Name of Operator/Applicant: Ziegler Chemical & Mineral Corp.  
Company ( ) Corporation (~~xx~~) Partnership ( ) Individual ( )
3. Permanent Address: 100 Jericho Quadrangle  
City: JERICO State: NEW YORK Zip Code: 11753  
Telephone Number: 516 ) 681-9600
4. Ownership of Land Surface:  
Private (Fee) ☐ Public Domain (BLM) ☒ National Forest (USFS) ☐  
State Trust Land/School Sections ☐ State Sovereign Lands ☐  
Other (please describe): \_\_\_\_\_
5. Ownership of Minerals:  
Private (Fee) ☐ Public Domain (BLM) ☒ National Forest (USFS) ☐  
State Trust Land/School Sections ☐ State Sovereign Lands ☐  
Other (please describe): \_\_\_\_\_

Utah Mining Claim Number(s): \_\_\_\_\_

Form MR-SMO

Utah State Lease Number(s):

Name of Lessee(s) ZIEGLER CHEMICAL &amp; MINERSL CORP

6. Have the above surface and mineral owners been notified in writing?

Yes ☒No ☐

(Copy of Letter of Notification is enclosed)

If no, why not?

Please be advised that if State Trust Lands are involved, notification to the Division of Oil, Gas and Mining alone does not satisfy the notification requirements of Mineral Leases upon State Trust Lands. Exploration or mining activity on State Trust Lands requires a minimum of 60 days notice to the Trust Lands Administration prior to commencing any activities. Please contact the School Institutional Trust Lands Administration (SITLA) at (801) 538-5508 for notification requirements.

7. Does the operator have legal right to enter and conduct mining operations on the land covered by this notice? Yes ☒ No ☐

## II. PROJECT LOCATION & MAP (Rule R647-3-105)

1. Project Location (legal description):

County(ies): UINTAH

SW	1/4, of	NE	1/4, of	NE	1/4:	Section: 3	Township: 10S	Range: 24E
	1/4, of		1/4, of		1/4:	Section:	Township:	Range:
	1/4, of		1/4, of		1/4:	Section:	Township:	Range:

2. A topographic base map showing the location of the proposed small mining operation must be submitted with this notice. A USGS 7.5 minute series map is preferred. The areas to be disturbed should be plotted in sufficient detail so that they can be located on the ground. It is recommended that the operator also plot and label any pre-existing disturbances in the immediate vicinity that he is not responsible for.

See Environmental Assessment and Mine Plan which is a part of this Notice.

## III. OPERATION PLAN (Rule R647-3-106)

1. Type of mining: Surface ☐ Underground ☒

2. Mineral(s) to be mined: GILSONITE

3. Provide a brief description of the proposed mining operation and onsite processing facilities. See EA & Mine Plan 2.1.1

On site processing: None. Ore will be loaded from hopper bin and hauled 7 miles to Ziegler's sacking plant

- ☐ New Road(s): Length NONE (ft) Width                      (ft)  
(No new surface disturbance is proposed)
- ☐ Improved Road(s): Length NONE (ft) Width                      (ft)

Total project surface acreage to be disturbed: None (acres)

Proposed startup date of project (month, year) March 10th, 1997

Proposed completion date of project, if known (month, year) OCTOBER, 2007

IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining:

1. Keep the mining operation in a safe, clean, and environmentally stable condition.
2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
6. Remove all waste or debris from stream channels.
7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
8. Conduct mining activities so as to minimize erosion and control sediment.
9. Reclaim all roads that are not part of a permanent transportation system.
10. Stockpile topsoil and suitable overburden prior to mining.
11. Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
12. Properly prepare seedbed to a depth of six inches by ripping, discing, or harrowing.
13. Reseed disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre of native and introduced species of grass, forb, and browse seed, and will provide a specific species list if requested.)
14. Plant the seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed 1/4-1/2 inch into the soil - fall is the preferred time to seed.
